

Foot Eczema Case Study

Subject: Male, approximately 5 years old

Eczema/Wound Size and Location: Covers bottom, sides and toes of the right foot

Product Used: Silver Biotics Armor Gel (24 ppm hydrogel wound dressing) and Silver Biotics Skin Cream

Wound Management Protocol: The Armor Gel was applied topically to the wound 2-3 times a day. After the gel was given a few minutes to soak in, the Silver Biotics Skin Cream was applied over the top with each application of the gel. When the open cracks and wounds closed up, only the skin cream was used daily.
